

HANDS-OFF PROTECTION FOR A HANDS-ON WORLD.

CASPR CONTINUOUS AIR & SURFACE PATHOGEN REDUCTON

WHY CASPR?

- ✓ Runs 24/7 without an operator or chemicals
- ✓ Requires no training or additional labor cost
- ✓ Provides a safe, healthy environment and peace of mind
- ✓ Is safe for occupied spaces and food preparation stations
- ✓ Easy to install and low maintenance
- ✓ Effective against bacteria, viruses, and mold
- ✓ Effective against odors and VOCs
- ✓ Noise-free, odor-free and creates no residue
- ✓ Produces no ozone

The CASPR technology has a kill rate of up to **99.96%** on surfaces.

CASPR is an innovative “no-touch” disinfection technology that utilizes a Natural Catalytic Converter (NCC) to create Hydrogen Peroxide out of your ambient air.

The hydrogen peroxide molecules neutralize molds, viruses, bacteria, odors, and VOCs, at the cellular level then revert to hydrogen and oxygen molecules. There is no buildup of hydrogen peroxide; the technology is safe to use in occupied spaces for people, pets, and plants.

Every CASPR product is **99.96%** effective against bacteria, viruses, molds, and even reduces VOCs and odors. By filling up space with oxidized air and blanketing all surfaces, CASPR provides that added protection and peace of mind we are all looking for.

Combat COVID with CASPR’s Continuous Air & Surface Pathogen Reduction Technology. CASPR was able to inactivate 99.99% of the SARS-COV2 virus within 24 hours. Once CASPR reduces pathogens in your air and on your surfaces, it works continuously to keep them down.

CASPR recreates what naturally happens outdoors. The levels of Hydrogen Peroxide CASPR creates is similar to what is found in outside, 0.01 Parts Per Million (PPM), and is roughly 100x below OSHA guidelines.

GSA Advantage!

CASPR PRO

CASPR PRO units are designed to be installed inside your air ducts. These systems are available in multiple sizes and can be combined to provide the proper dose of oxidizers for your space while optimizing the cost per square foot. Once installed and turned on, CASPR PRO units provide continuous, automated air and surface protection for your entire facility.

CASPR 400
CASPR 1000
CASPR 2500
CASPR 5000

CASPR COMPACT

CASPR COMPACT units are designed to be used in areas where more permanent installation is not an option. This unit also displays the versatility of the CASPR Product line as a solution to take with you where ever you may go. Equipped with its own fan, this unit will provide the proper dose up to 1,500 sq.ft. Once turned on, CASPR COMPACT units provide continuous air and surface protection for your space.

CASPR BLU TILE

CASPR BLU TILE units can be installed in any tiled ceiling and is suited for all indoor areas where people live or work. Once installed and turned on, the soft blue glow lets you, your employees and your customers know the CASPR BLU TILE is working to provide air and surface protection throughout the entire building. These units are often used in conjunction with CASPR PRO units to serve the entire facility.

CASPR TRANSIT

CASPR TRANSIT units have been specially designed for buses, trains, and other transportation vehicles. They are easy to install, low-profile, silent, tamper resistant, and available in both AC and DC power options. Once installed and turned on, CASPR TRANSIT units provide continuous air and surface protection for your entire vehicle and its passengers while in use.
